

UNIVERSITÀ DEGLI STUDI DI MILANO
SCUOLA di DOTTORATO
“TERRA, AMBIENTE, BIODIVERSITA’
Corso di Dottorato in Scienze della Terra

Milano - 7-11 Novembre 2011 - Short course (5 cfu)

Gas hydrates in sediments: the present and the past.
by **Alberto Malinverno**

PROGRAM

- * Gas hydrate stability and methane supply
- * Climate change and gas hydrate formation/dissociation
- * Hosts of marine gas hydrates: recent sediments on continental margins
- * Biogenic production of methane in sediments
- * Gas hydrate textures
 - Observing and measuring gas hydrates
- * Modeling the formation of gas hydrates.
- * Gas hydrates and geological record

Alberto Malinverso
Senior Research Scientist

Lamont-Doherty Earth Observatory, NY - USA
